Notice

This is to inform you that all students are required to enroll to a value-added course called **Integrated Waste Management for a smart City** offered by NPTEL. This course is a value-added course of more than 40 hours duration and it will be beneficial for the civil engineering students in improving their career profile. For session 2019-20, Certificates will be provided for this course by NPTEL.

You all are required to enroll in the course as it is very essential as per current Industry requirement. This is mandatory for all 3rd semester civil engineering students.

NOTICE

All the students of CSE are informed that Swayam NPTEL courses portal will open for the session 2019-20 from July 2019. All students are required to enroll in course(s) of interest for improving their success in placement and higher studies. The course evaluation scheme and other details will be available in the course after registration. So, students are advised to register and complete the course successfully. Some of the courses important from placement perspective are given below for registration.

Course(s):

Introduction to Internet of Things.
Python for Data Science - Online
AWS Fundamentals
Building Deep Learning Models With Tensor Flow
C FOR Everyone
C++ FOR PROGRAMMERS
Crash Course on Python
Cyber Security and IOT
Data Science in Real Life
Neural Networks and Deep learning

Improve Your English Communication Skills

This Specialization helps you improve your professional communication in English for successful business interactions. Each course focuses on a particular area of communication in English: writing emails, speaking at meetings and interviews, giving presentations, and networking online. Whether you want to communicate to potential employers, employees, partners or clients, better English communication can help you achieve your language and professional goals. The Capstone will focus especially on making those important connections to take your career or business to the next level. Make yourself more competitive by improving your English through this Specialization: Improve Your English Communication Skills.

An Introduction to Programming the Internet of Things (IOT)

Design, create, and deploy a fun IoT device using Arduino and Raspberry Pi platforms. In this Specialization covers embedded systems, the Raspberry Pi Platform, and the Arduino environment for building devices that can control the physical world. In the final Capstone Project, you'll apply the skills you learned by designing, building, and testing a microcontroller-based embedded system, producing a unique final project suitable for showcasing to future employers.
