### 4.7 User Support and Problem Correction

The following procedures will be used to respond to problems that are received by the help desk. A problem is defined as an unplanned system event which adversely affects application processing or application deliverables.

Measurement period for User Support and Problem Correction SLAs is a calendar month.

### 4.8 Prioritization Approach

Service requests for problems received by the help desk will be given a Severity Code from 1-4 based on how important responding to the problem is to the primary business of The Client as a whole, as well as the availability of workarounds. The Severity Code will be the basis for scheduling work on the backlog and assigning resources to the request. Critical, important, and supportive application functions are defined in the section below on Application Function Type, with a complete list of application functions included in this agreement.

Severity Code	Definition
1	A problem has made a critical application function unusable or unavailable and no Workaround exists.
2	A problem has made a critical application function unusable or unavailable but a workaround Exists.
3	A problem has diminished critical or important application functionality or performance but the functionality still performs as specified in the user documentation.
4	A problem has diminished supportive application functionality or performance.

### 4.10 Response and Resolution Times

Severity codes are used in order to determine appropriate response and resolution times. Response and resolution times are measured from when the incident is opened by the help desk. If the problem is not resolved within the defined timeframe, continuous effort will be applied until the problem is resolved. The problem/issue will follow the escalation levels of Severity Code from 4 to 1

The Issue reported should be recreatable along with scenario.

Severity Code	Initial Response	Estimation Response	Subsequent Responses	Resolution
1	15 minutes	2 hours	Every 30 min.	5 hours
2	30 minutes	2 hours	Every 2 hours	8 hours
3	1 hour	8 hours	Every 4 hours	3 calendar days
4	1 hour	Next business day	Weekly	8 calendar days

Initial Response is when a ticket is opened and acknowledged by help desk staff.

Estimation Response is when the user that logged the ticket is informed of an estimated resolution time.

Subsequent Responses is the frequency with which the user that logged the ticket is updated on the resolution status.

Resolution is the point at which the problem is resolved and the application function is returned to a usable and available state after End user satisfaction.
