Improve Your English Communication Skills

This Specialization helps you improve your professional communication in English for successful business interactions. Each course focuses on a particular area of communication in English: writing emails, speaking at meetings and interviews, giving presentations, and networking online. Whether you want to communicate to potential employers, employees, partners or clients, better English communication can help you achieve your language and professional goals. The Capstone will focus especially on making those important connections to take your career or business to the next level. Make yourself more competitive by improving your English through this Specialization: Improve Your English Communication Skills.

An Introduction to Programming the Internet of Things (IOT)

Design, create, and deploy a fun IoT device using Arduino and Raspberry Pi platforms. In this Specialization covers embedded systems, the Raspberry Pi Platform, and the Arduino environment for building devices that can control the physical world. In the final Capstone Project, you'll apply the skills you learned by designing, building, and testing a microcontroller-based embedded system, producing a unique final project suitable for showcasing to future employers.

This online specialization is based on the core hardware and software concepts from the course. It is not a formal course and does not provide a transcript. But the specialization is designed to help you learn the skills you need to succeed in the field of IoT. The specialization is a self-paced, non-credit program that you can complete at your own pace.
